## **COMPLETE INSPECTION SPECIALISTS, Inc.**

44319 Macomb Industrial Dr.  
Clinton Twp., Michigan 48036  
Phone **586-466-5993** Fax **586-466-5981**  
Web-site: [www.your-checkroom.com](http://www.your-checkroom.com)

**Complete Inspection Specialists, Inc.** is dedicated solely to meeting the dimensional inspection and certification requirements presented to suppliers in all areas of manufacturing. Our fully automated TARUS CMM's with operating envelopes of up to 8 feet by 6 feet by 5 feet give us the capability to fill all of your certification needs. Our experience, from idea to finished product, helps us develop a program that will meet and exceed your dimensional inspection needs. We are **ISO / IEC 17025:2005 ACCREDITED.**

We are familiar with the inspection requirements and standardized reports developed by the major auto manufacturers or we can develop an inspection report tailored specifically for your application.

Inspection data can be developed from the data you supply, from the math or CAD data if available or from a blueprint or other drawing if necessary. With sufficient data, it is often possible to certify a model, pattern, tool or part without machined bases or an elaborate fixture.

In situations that require repair or modification to meet dimensional standards, we can arrange to have repairs or changes made as necessary. If a fixture is required, we can build or have built anything from a simple holding fixture to a certified datum fixture.

Our scanning (digitizing) capability will allow you to record changes to a tool or part for modification to math data or total "reverse engineering" to develop math data from a free designed tool, pattern, model or mock-up.

At **Complete Inspection Specialists, Inc.**, we understand that inspection is usually the last step in supplying a part or product. We know that this usually means that there is a limited amount of time available to complete the necessary inspections. Our objective is to make the submission process as simple and timely as possible. We will do whatever it takes to get the job done quickly and efficiently.

We can arrange for pick-up and delivery if necessary.
